

# Team iPatch Game - User Manual

You control a ship with the keys W for forward, A and D for turning and S for deceleration, as well as space for shooting out the cannon.

You will encounter enemies that will chase you down and deal damage on contact. They can be killed through being shot and will give you points and gold in return.

The gold can be spent at the departments – biology and computer science, which are a blue and a green box that show a shop screen when approached. Items can be with the mouse if you have enough gold.

The objective of the game is to defeat the three colleges on the map – Alcuin, Derwent and Vanbrugh. Upon being defeated the college by shooting it, it will turn green and stop shooting, as well as giving you a large amount of gold.
